## Phone setup

### Getting your phone ready for mobile e-mail services

To use the e-mail application in your phone, you need to install e-mail settings in your phone and your network subscription must support mobile data.

#### E-mail Configurator

##### Thank you.

Your settings will be delivered shortly.

When the settings have been received the handset will display a symbol of an envelope to indicate that there is an unread message.

1. Tap on **Messages**
2. Tap on **SMS**.
3. Tap on the unread message.
4. Tap on **Accept**.
5. The handset will display that a new email account has been added. Tap on **Continue**.

The settings have been applied and are ready for use.
